Subject: RE: Docket 7533 - SPEED

Hi Susan,

Regarding the question of how to redistribute the unused kilowatts from the technology cap in the SPEED Standard offer Alteris would like to propose the following:

- From my accounting there is 24,351 kW unassigned (Farm methane, Landfill methane, and Hydropower) and potentially available for redistribution
- I propose redistributing this equally to Solar, Biomass, and Wind (8117kW each) for a period of three months. After three months all remaining unassigned kW would go to Solar because it has a demonstrated capacity to fill the queue.

Best,

Nils Behn
